Compusoft Advisors Expands Global Footprint to Power Enterprise Application – Scale AI and Cloud Transformation

Compusoft Advisors celebrates its 28th anniversary, the company is entering into a new chapter of accelerated global expansion and dedicated to delivering enterprise-grade AI, cloud, and sustainability solutions at scale. Compusoft is well positioned for the next phase of growth by establishing a strong presence across India, Singapore, and Australia, and intelligent, scalable delivery into North America, the Middle East, and Europe, as the company builds the future-ready global delivery model to meet the evolving needs of modern enterprises.

This expansion is supported by Compusoft's agile-first approach to enterprise application transformation by leveraging modular, iterative service delivery and championing continuous feedback loops for faster go-lives, enabled flexibility, and

sustained business alignment efforts. The strategy is to invest strategically in certified AI talent, regional delivery hubs, and partner ecosystems so Compusoft can functionally deliver high-impact solutions that are culturally aligned beyond borders.

Compusoft's AI and Copilot Enablement strategy has made the company a leader in AI-led transformation. The company is building AI agents, virtual assistants, and domain-specific bots with Microsoft Copilot Studio and leading clients through AI readiness assessments and governance frameworks. Also as a Microsoft-certified ISV, Compusoft is fast-tracking its product portfolio—with offerings such as Space Management and BuildEx CRM developed in the Microsoft Dynamics platform across and also its available Microsoft AppSource and Azure Marketplace.

Simultaneously, Compusoft is growing its cloud and sustainability transformation services. Utilizing its specialization in Azure cloud migration and Microsoft Cloud for Sustainability capabilities, Compusoft is helping organizations embed ESG metrics into operational workflows and reporting frameworks.

Devesh Aggarwal, Director, Compusoft Advisors stated that, "Our expansion reflects a deep commitment to empowering enterprises with the scale, intelligence, and agility they need to lead in a rapidly evolving digital landscape. By strengthening our global delivery capabilities and investing in AI, cloud, and sustainability, we are not just growing our footprint—we are reinforcing our role as a transformation partner that delivers real-world outcomes. At Compusoft Advisors, we don't just implement technology; we guide businesses through it as their trusted AI Saarthi."

As part of our evolution, we have unveiled a new logo and transitioned from Compusoft – World of Software to Compusoft Advisors – Your Trusted AI Saarthi. This refreshed identity reflects our shift toward advisory-led, AI-powered transformation—backed by agile delivery models that ensure continuous value and alignment with dynamic enterprise needs.

This global growth framework reinforces Compusoft Advisors' mission to support enterprises around the world to effect intelligent, sustainable, and outcome-driven transformation. The company stands as a trusted AI Saarthi to enable organizations to navigate the next generation of digital modernization with clarity, agility and scale.
